RURAL HEALTH CENTER WINDING WATERS MAKES BIG IMPACT BY ADDING SPEKE AI SCRIBE

THE CHALLENGE

Rural health center Winding Waters had an opportunity to make a big impact. Serving nearly 2,200 citizens in Enterprise, Oregon, the non-profit FQHC reached out to ScribeAmerica to help them make a difference. By alleviating documentation time, providers could focus on the many other hats they had to wear in a rural setting including home visits, ED shifts, and more.

WINDING WATERS

Serving 2,181 citizens
Households 901
Median Age 43
of Providers 26
Specialties Medical, Dental, Mental Health, Physical Therapy, Pharmacology

IN RURAL SETTINGS

3 OUT OF **5**

federally designated health professional shortage areas are in rural regions

IN OREGON

53%

providers increased their usage of support and mental health programs

ENTER speke

Winding Waters' rural location poses unique challenges - and it's why small changes can make a big impact. Not only must providers take on multiple roles, but they also travel frequently between locations to treat patients. This made it difficult to add additional team members on site. Speke Ambient AI was the perfect ScribeAmerica solution to support documentation for providers on the go. Eight providers added Speke to their daily workflow. The impact was immediate.

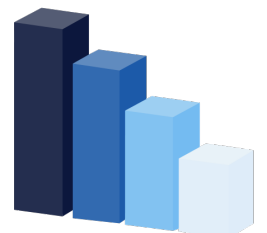

15 MINUTES
average visit length with Speke

1,000+ PATIENTS PER MONTH
patients seen in a month with Speke

\$40,000 NET ANNUAL SAVINGS
reported net annual savings in staffing

speke

2.5 HOURS
saved per shift after deployment

“SPEKE HAS CUT OUR DOCUMENTING TIME BY 50% OR MORE.”
