A busy Emergency Department decided in early 2023 to explore solutions to address labor shortages and rising costs. Partnering with ScribeAmerica, they initiated 1:1 scribe coverage for all providers in the department. Since deployment, the emergency department has experienced a 19% increase in patients per hour and improvement in RVU/hr. The practice Operations Manager noted increased productivity among the providers. The improvement was noticeable across the organization, with the facility Medical Director adding that, “[ScribeAmerica’s] scribes have helped with the stress of documentation and allowed us to focus on the patient.”
